

Tyrese Thomas

AI Engineer / Software Developer

mrtthomas2@icloud.com • 07904 905778 • London • github.com/ty4kt • linkedin.com/in/tyrese-t

SUMMARY

Computer Science graduate and AI engineer focused on building practical, reliable AI systems — agents, automations, and the tooling around them. I start from the real problem, ship working software not demos, and think about what breaks at scale. Comfortable across Python, TypeScript and the Claude API, with a track record of taking projects from idea to deployed tool.

TECHNICAL SKILLS

AI Engineering: Claude API, agent design, prompt & context engineering, agentic workflows (WAT pattern), tool use / function calling, retrieval (Tavily)

Languages: Python, TypeScript / JavaScript, SQL, HTML / CSS

Frameworks: React, React Three Fiber, Node / Vite

Practice: Git & GitHub (branch → PR → review), REST APIs & integrations, code review, documentation

PROJECTS

AI Lead Research Agent

github.com/ty4kt/ai-lead-research

Python · Claude API · Tavily · BeautifulSoup

- Automated pre-sales research tool: input a company name, get a one-page AI opportunity brief in under 60 seconds.
- Built on the WAT pattern (Workflows → Agent → Tools) with modular Python tools for search, scraping, synthesis and delivery.

Personal AI Operating System

Private — available to demo

Claude Code · agents · skills

- Designed a personal AI system of custom skills and least-privilege subagents layered on my own context.
- Handles onboarding, self-auditing, structured decision logging, and interview prep — each capability composable and reusable.

Interactive 3D Portfolio Website

github.com/ty4kt/portfolio

React · TypeScript · React Three Fiber · Vite · Vercel

- Designed and built an interactive 3D personal site from scratch, deployed on Vercel with a CI-friendly git workflow.

EXPERIENCE

Engineering Contributor

Mar 2026 – Present

Early-stage AI Platform (small team)

- Part of a small production team building an AI platform — a layer for working with LLMs and multi-agent systems.
- Contributing to engineering work as the platform moves toward launch.

Sales Representative

Mar 2024 – Mar 2026

Commission-based, face-to-face sales

- Commission-only field sales. Built clear communication, resilience, and the ability to quickly read what a person actually needs.

EDUCATION

BSc Computer Science

2022 – 2025

Goldsmiths, University of London · 2:1 (Upper Second)
